

Grupo Security Recognized for Transformations in Management Control Areas, Leading with Data

May 24, 2019

Dallas - May 15, 2019 – Qlik equips its clients with tools to see more deeply into customer behavior, reinvent business processes, discover new revenue streams and balance risk and reward. It does business in more than 100 countries and serves over 48,000 customers around the world. Qlik today announced the winners of its annual Global Transformation Awards, recognizing customers who are using Qlik to lead with data when driving their digital transformations. The awards were presented at Qconnections 2019, the company's global customer and partner event, and represent a cross-section of organizations from various industries that are leveraging analytics to drive significant business outcomes.

"Leading brands are embracing the power of data through Qlik as they execute company-wide digital transformation efforts," said Mike Capone, Qlik CEO. "We're thrilled to be on this journey with our customers, and look forward to helping them continue their evolutions through data."

The 2019 Qlik Global Transformation Award Winners:

- **AmeriGas:** AmeriGas is the largest propane retailer in the United States, serving over 1.7 million customers in every state from approximately 1,900 distribution locations. AmeriGas leverages Qlik to provide its field and executive teams with real-time data to pinpoint delivery priorities, analyze and adjust distribution routes and service delivery based on customer needs, and to more accurately forecast and execute production needs for its distribution locations.
- **Grupo Security:** Grupo Security is a diversified financial group in Chile that offers a variety of services, including banking, insurance and asset management to large and medium-sized companies and high net worth individuals. Grupo Security created a data governance structure with a highly demanding challenge, and chose to build a single platform in Qlik which allows them to have just one information system that provides an integrated vision. This enables the Group to focus all their efforts on creating a story of value for the Grupo Security Project and becoming the most powerful storytellers. The project covered the main reports from all management control areas in the Security companies.
- **Lloyd's of London:** Lloyd's is the world's leading insurance and reinsurance marketplace, protecting assets, promoting growth and providing specialist insurance services to customers in over 200 countries and territories. Lloyd's uses Qlik as a part of its global data transformation strategy with an emphasis on data literacy, a strategic priority for empowering people across the organization and market to get more insight and value from data.
