This report contains projections based on the intentions, assumptions and expectations of the management of Grupo Security S.A. about the future functioning of the different business units. These projections do not guarantee future results and are subject to significant risks and uncertainty. It is possible that the actual results will differ from those projected due to various factors not anticipated like changes in global economic conditions, changes in market conditions, regulatory changes, actions of the competition, and operative and financial risks inherent to the financial services business.
